DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a method of treating or preventing actinic keratosis, classified in class 514, subclass 633, 844, 845, 846; class 424, subclass 401.
 - II. Claims 8-14, drawn to method of treating or preventing skin disorders other than actinic keratosis, classified in class 514, subclass 633, 844, 845, 846; class 424, subclass 401.
2. The inventions of Groups I and II represent separate and distinct methods. They differ with respect to host to be treated, the particular function of the treatment and final results. They therefore have different issues regarding patentability and enablement and represent patentable distinct subject matter.
3. Claims 1-14 are generic to a plurality of disclosed patentably distinct species comprising various compounds defined herein. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Further, if invention group II is elected, a further species election of a particular skin disorders is required.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
